# Accelerate your cloud migration and embrace zero-trust security with vArmour and Microsoft

## ABOUT VARMOUR:

vArmour helps simplify, secure, and accelerate application migrations by automatically discovering, observing, and understanding the relationships and dependencies among applications and workloads across all enterprise environments.

### What our customers are saying

“With the increasing complexity of cyberthreats, our recent investment in vArmour allows businesses like ours to control operational and cyber-risk across any digital platform in a single view, so security across the critical banking applications we use can be enhanced.”

– Bill Winters, Group Chief Executive, Standard Chartered Bank

## WHAT WE OFFER

vArmour integrates with Microsoft technologies to accelerate companies’ secure migrations to the cloud and drive implementation of zero-trust architecture (ZTA) strategies.

The vArmour integration with Microsoft solutions—and the alignment of its relationship-based platform with Microsoft Cybersecurity Reference Architecture (MCRA) and the National Institute of Standards and Technology (NIST) zero-trust control framework—enables companies to plan their migrations more effectively, reducing risks and service disruptions while keeping both schedules and budgets in check.

The vArmour Relationship Cloud integrates with key Microsoft security technologies—including Microsoft Sentinel, Defender, and Azure Active Directory (Azure AD)—to provide greater visibility and actionable security controls over identity and to improve application access management across the enterprise.

# Why Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
